

VOLUME 3 EDITION 2 - FEB 2008

Security is not just a question of being safe and free from anxiety. It's about trusting those around you and ensuring peace of mind.

At Basscomm Nigeria Limited, we understand what it means to be safe and secure. It is in knowing that the safety of your loved ones, goods and property is in good hands.

With Tyco Fire & Security, (a major business segment of Tyco International Ltd.), Basscomm Nigeria Limited provides electronic security and fire protection solutions to thousands of clients within Nigeria and beyond. With billions of Naira in annual sales and large competent workforce, its products and services are used to prevent fire outbreaks, deter thieves and protect people and property.

Basscomm has been designing and installing Closed Circuit Television (CCTV) Systems for over ten years. And in the recent past has installed a large number of IP CCTV cameras in various locations nationwide; Basscomm therefore possess extensive experience and technical expertise in the selection and application and support of reliable security equipment.

Basscomm designs solutions that enable security network for Closed Circuit Television, Intruder Detection System, Access Control Systems, using Tyco Ccure software with

Project of the Month

Queens-Drive Residential Development

Basscomm was awarded the contract for the Design and Installation of Electronic Systems and Hotel Door Lock System - a combination of Locks and Biometrics for the Queens Drive Residential development.

the following criteria guiding our design: The need for clarity, speed, accuracy of image/information and ease of system manipulation and control.

Most importantly, Basscomm is committed to giving you peace of mind. From retail and commercial buildings to large industrial and government facilities, we offer total assurance with our complete range of security products and services to meet your everyday needs.

+ Access Control

Buildings which are visited by large numbers of people or contain highly sensitive areas require intelligent access management systems. Our access control systems can be used to regulate access and register employee working periods.

+ Intruder Detection System

Intruder alarm systems can be used to effectively protect human lives and property. The objective here is to detect attempts at burglary as early as possible and trigger appropriate alarms. Intrusion and burglar alarm systems may act as a deterrent in the first place or, on detecting a burglary, quickly and accurately alert central alarm stations.

+ Closed Circuit Television (CCTV)

Our CCTV systems are based on interplay between digital video technology, standard modern personal computers and telecommunication. The use of several video cameras, visible or concealed, allows uninterrupted recording and monitoring of sensitive security areas. A PC-database allows video recordings to be managed easily and called up at any time.
